

FLYING HAWK CRAFT

Red-tailed Hawks in the City

- These birds of prey that eat a lot of rodents, but will also hunt pigeons in city parks.
- Their broad wings help them soar high up in the sky..
- They get their name for their rusty red tail.
- Look for these hawks on street lights, telephone poles and tall trees.

Materials:

- Hawk Template printed on card stock (see below)
- String or yarn (12 inches)
- 4-6 Beads
- Colored pencils, crayons, markers, etc.
- Scissors and a hole punch (if available)

Directions:

1. Color in the hawk template provided.
2. Cut out the hawk shape.
3. Cut out the circle in the middle of the template or use a hole punch.
4. Tie 2-3 beads to the end of the string. Slide the template down the string. Add 2-3 more beads on top of the template. Tie a knot to keep the beads and template secure.
5. Hold the top of the string and move your arm around in circles to let your hawk fly.
