

HAND PRINT LADYBUG

Ladybug Facts

- When flying, ladybugs can beat their wings about 85 times per second!
- A ladybug can eat 5,000 aphids in its life.
- Ladybugs are brightly colored to warn predators that they do not taste good.

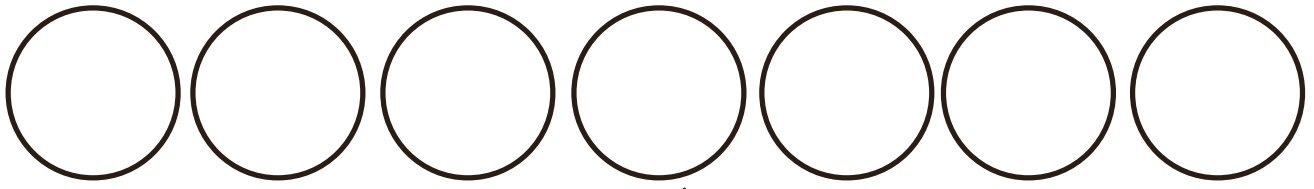

Materials:

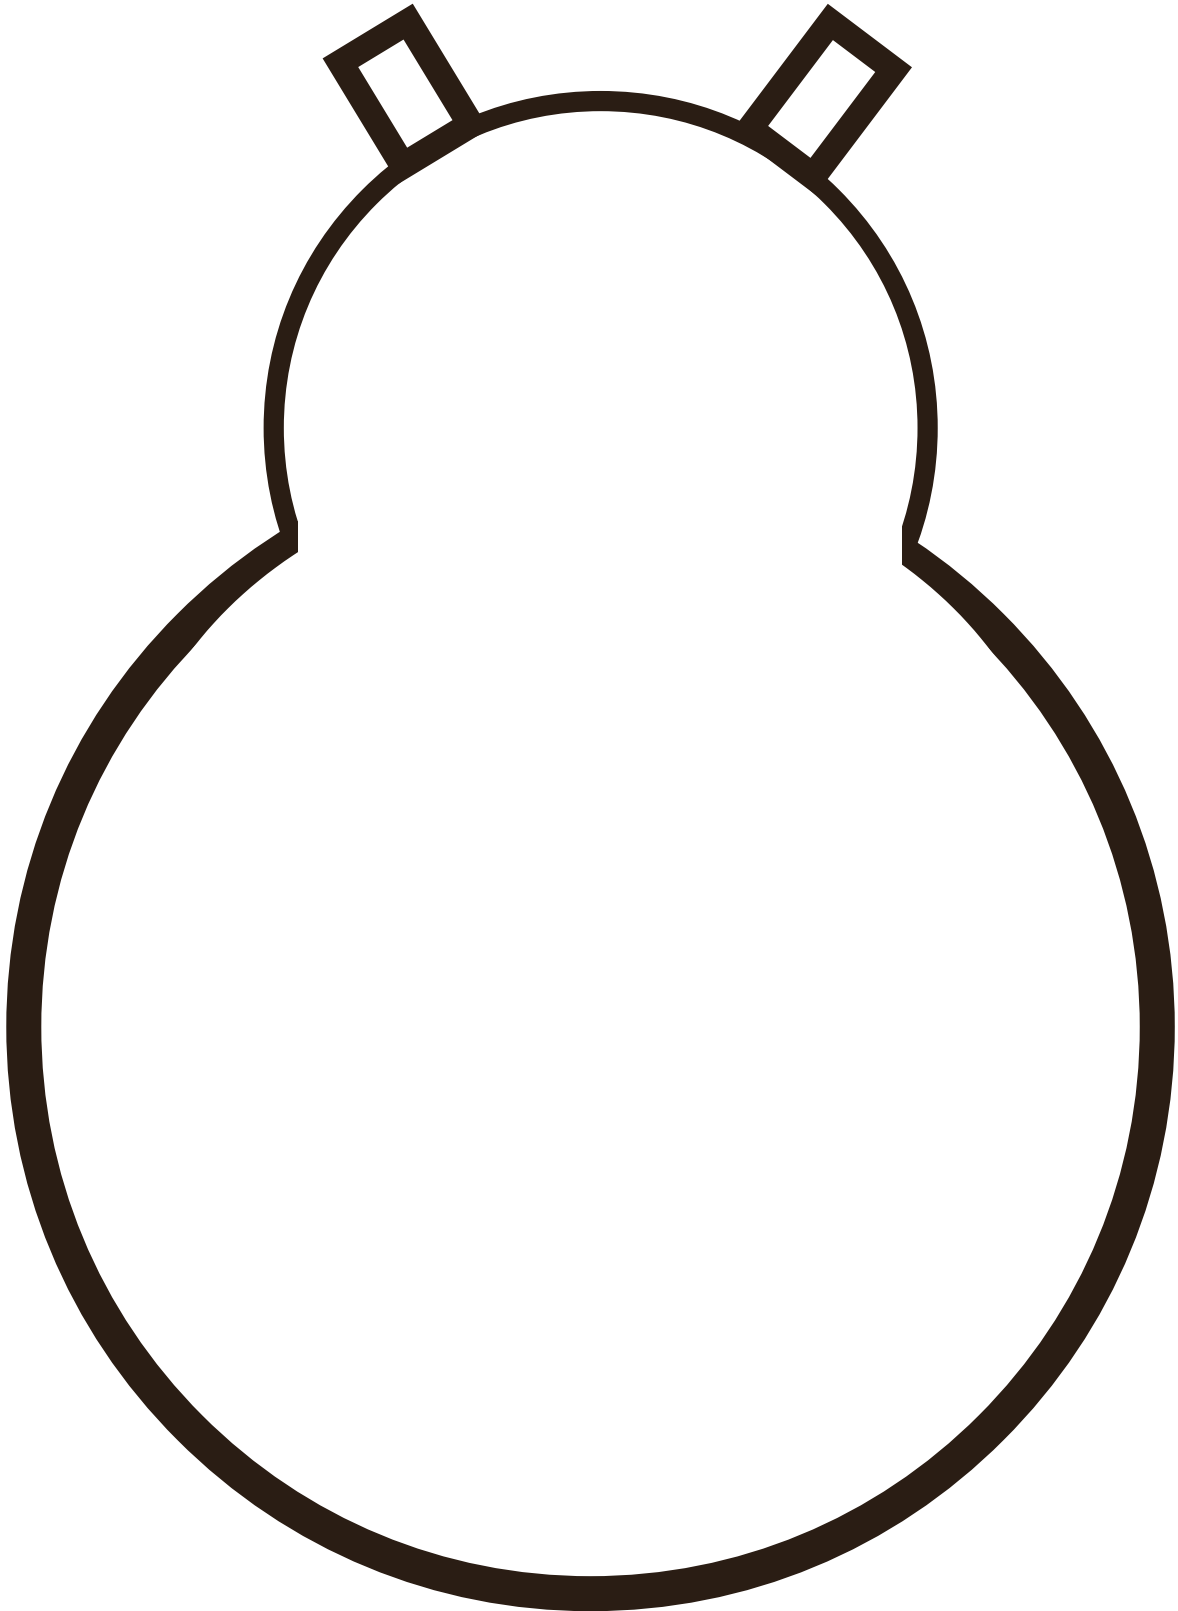

- Black and red construction paper or white paper and markers
- Body template (page 2)
- Glue stick or tape
- Scissors
- Pen or pencil
- Googly eyes (optional)

Directions:

1. Trace your hands on the red paper. If you are using white paper, trace and color the hands red.
2. Cut out the hands
3. Color the body template or trace it on black paper. Cut it out.
4. Glue the hands to the body.
5. Color and cut out the spots.
6. Glue the spots onto the hands.
7. Add googly eyes or draw and cut out eyes from the white paper.
