

BE A DINOSAUR DETECTIVE!

CAN YOU FIGURE OUT WHAT THESE DINOSAURS HAD FOR DINNER?

Paleontologists are scientists who study dinosaurs. Fossils are the remains or traces of plants and animals that lived long ago. Fossils provide scientists with clues to where dinosaurs lived and how they survived.

Become a paleontologist!

1. Observe the pictures of these dinosaur skull and teeth fossils.
2. Decide which dinosaurs were **plant-eaters** and which ones were **meat eaters**.
3. **Circle** the ones that are plant eaters and make a **box** around the meat eaters.
