

AmeriCorps Service Member Position with TerraCorps & Audubon Society of Rhode Island

TerraCorps is a nonprofit organization working at the intersection of land conservation, sustainable farming, and local food systems to build local nonprofit capacity while growing the next generation of emerging leaders committed to making a difference at the community level. We value the power of local nonprofits to best understand and serve their communities, and our goal is to help them succeed by providing them access to the AmeriCorps national service model to build organizational capacity.

TerraCorps partners with a network of 40+ nonprofits in Massachusetts and Rhode Island focused on community needs related to local land conservation and sustainable agriculture. These partners act as service sites for a new cohort of up to 52 AmeriCorps service members annually. Service members are paired with a site supervisor who provides guidance and mentorship while they learn to manage community programs and projects over a 1,700-hour service term. The 2025-26 service year runs September 22, 2025, to July 31, 2026.

Audubon Society of Rhode Island is interviewing candidates for a Community Engagement Coordinator (CEC). The CEC will engage with the Director to manage volunteers on community service projects, educate or train individuals in environmental stewardship or environmentally conscious practices, and complete three capacity building projects. Potential projects include:

- Work on a variety of Community Science Monitoring programs including Watershed Watch water quality monitoring, Canada Goose Survey in Roger Williams Park, and Rain Snap a green infrastructure monitoring program.
- Work with multiple grade 5-12 schools in Rhode Island on developing stormwater and water quality related curriculum and content for the classroom and field trips to Roger Williams Park
- Assist in creating, developing and promoting an Interactive StoryWalk along the 3.7-mile trail at Roger Williams Park to educate the public about stormwater and water quality through engaging signs, community input, and hands-on activities that promote practical conservation actions.

Applications for this position must be submitted via the TerraCorps online application. The position description for the CEC at Audubon Society of Rhode Island can be found at [TerraCorps Available Member Positions](#).
