

***Insects have amazing life cycles!*** Did you know...

- Insects can look totally different in each stage of their life.
- Some insects, like bees, have 4 life stages: egg, larva, pupa & adult.
- Other insects, like grasshoppers, have a less complicated life cycle: egg, nymph, adult.

Match the young insects in Column A with the adult insects they become in Column B.

## COLUMN A

larva

wiggler (larva)

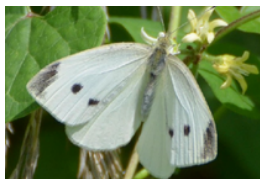

caterpillar (larva)

naiad (nymph)

## COLUMN B

butterfly

dragonfly

ladybug

mosquito
