

COMMUNITY REPORT

AUDUBON SOCIETY of Rhode Island

LITTLE COMPTON AND TIVERTON

EMILIE RUECKER WILDLIFE REFUGE, TIVERTON

Audubon Society of Rhode Island

NATURE IS NOW MORE IMPORTANT THAN EVER.

Through land conservation, the Audubon Society of Rhode Island will always protect critical habitat for birds and wildlife in Little Compton and Tiverton. We advocate locally and at the state-level on environmental issues impacting your community, our educators bring nature-related programs to school children and the public in your area, and we look to connect you and people of all ages with nature. With your support, our work will continue to have a lasting impact.

This year, our advocacy efforts resulted in a series of legislative victories. Most significantly, the use of deadly neonicotinoid pesticides in our neighborhoods and parks has been restricted. These toxic chemicals not only kill birds, bees, and other pollinating species, they also seep into our ground water. This legislation is only the beginning. We will continue the fight to ban these and other toxic chemicals that harm our ecosystems.

Audubon's award-winning environmental education programs reach thousands of Rhode Islanders of all ages each year in schools, libraries, community centers, and on our wildlife refuges. Our educators bring hands-on science and nature programs to school children across the state, providing experiences that support classroom learning and foster a connection with the natural world.

A \$100,000 federal grant was recently awarded to Audubon to ensure that children in city communities have access to experiential learning opportunities in schoolyards, classrooms, local parks, and on Audubon wildlife refuges.

We protect nearly 9,500 acres of conservation land in Rhode Island and nearby Massachusetts, including fourteen wildlife refuges that are open to the public for hiking and wildlife observation. Through a new avian research initiative, Audubon properties have been identified as being significant habitats for threatened bird species as well as important resting areas for migrating birds. Additional details about this new initiative are included in this community report.

Your support of the Audubon Society of Rhode Island directly impacts environmental education and conservation initiatives in Little Compton and Tiverton, and provides nature with a voice at the State House. With your help, along with our members and other supporters, we will continue our work to protect our state's natural heritage – resulting in greener, healthier communities for all.

Please give as if nature depends on you... because it does. Donate to Audubon today at asri.org/donate.

Thank you for your support!

Jeffrey C. Hall
Executive Director

Connecting People With Nature

Audubon Society of Rhode Island • 12 Sanderson Road, Smithfield, RI 02917 • (401) 949-5454 • www.asri.org

CONSERVATION

- Protects approximately 9,500 acres of habitat in Rhode Island, including 36 acres in Little Compton and 63 acres in Tiverton.
- Coordinates the state-wide Osprey monitoring program, including five sites in Little Compton and three sites in Tiverton.
- Protects forest and coastal habitats, natural areas that are critical in the face of climate change and sea-level rise.
- Manages the Youth Conservation League, employing high school and college students in summer to gain experience in conservation; completed work in Little Compton at Blanchard and Blazer Preserves.

AVIAN RESEARCH

The Audubon Avian Research Initiative has engaged numerous volunteers to monitor the current abundance and distribution of birds in Rhode Island. This research will guide habitat management plans to enhance long-term biodiversity and minimize the impacts of climate change on birds utilizing Audubon wildlife refuges and properties throughout New England.

- First comprehensive baseline data survey was conducted on breeding, nonbreeding and migratory birds on 14 Audubon wildlife refuges to understand the needs of birds over their full annual cycle.
- Surveys were completed at Emilie Ruecker Wildlife Refuge in Tiverton.
- Over 400 volunteer hours were spent collecting data.
- Audubon partnered with an analytical chemistry lab at URI to process soil and water samples from our properties to determine the presence of dangerous neonicotinoid (neonics) pesticides. Presence of neonics in soil or water will prompt the collection and analysis of bird feathers to determine the extent to which these chemicals may be impacting our local bird communities.
- A final "State of Our Birds" report will be released in early 2023 summarizing the results from the year-long baseline data collection and the first-round of neonicotinoid analysis.
- Partnering with an international effort to track migratory species using the MOTUS Wildlife Tracking System to aid researchers throughout North America in tracking birds, insects and bats. This will allow Audubon to perform in-house research on the movement dynamics of birds using our refuges for breeding, wintering or as migration stopover habitat.

EDUCATION

SCHOOLYARD HABITAT RESOURCE GUIDE

Audubon encourages schools to create natural spaces on their grounds for outdoor learning and nature exploration. The Schoolyard Habitat Resource Guide, produced in 2020, provides age-appropriate activities linked to core subjects with tips for outdoor teaching and safety. It complements the national Schoolyard Habitat Program led by the U.S. Fish and Wildlife Service.

AUDUBON AT HOME

Audubon offers a free online environmental education resource for teachers and parents of children in Pre-K through Grade 4. Featuring more than 25 nature themes, Audubon at Home offers online activities, animal videos, stories, crafts, fact sheets, and behind-the-scenes tours. Visit asri.org/audubon-at-home.

LITTLE COMPTON

- Long-standing relationship with Little Peeps Montessori Natural-skola, a preschool focused on outdoor learning and nature. Audubon brings activities and animal ambassadors to the young students several times a year.
- Wilbur-MacMahon third graders participated in a Life Cycles program and met a frog up-close.

TIVERTON

- Audubon's Emilie Ruecker Wildlife Refuge on Seapowet Road is a local natural treasure. Visitors hike the well-marked trails year-round.

ADVOCACY

- Audubon co-led efforts to once again position Rhode Island as a national leader in its response to the climate change crisis. Climate change is the biggest threat to birds, wildlife, and people as it brings flooding, hurricanes, and fires. With the passage of 100% renewable electricity by 2033 and up to 1,000 megawatts of additional offshore wind, there is a path for the State to meet the mandatory carbon emission reduction goals set by the Act on Climate law. Audubon partners with fellow environmental organizations, labor coalitions and policymakers in this critical work.
- Continues to co-lead advocacy for legislation and state and local policies to prioritize the protection of forests and drive the siting of renewable energy on already disturbed land.
- Serves on the Forest Conservation Commission, advising the RI Department of Environmental Management on how to promote forest values and pursue strategies to preserve private forestland. Also serves on the House Commission on Land Use, studying land use and zoning issues from preservation to housing.
- After years of leading legislative campaigns to protect pollinators that support our ecosystem and food supply chain, a critical step in managing the impacts of harmful pesticides was achieved in 2022 with the passage of the bill to regulate neonicotinoids.
- Working with partners, Audubon supported significant victories on long-time environmental issues with toxics and plastics: banning of PFAS known as "toxic forever chemicals" in food packaging and capping them in drinking water, and a statewide single-use plastic bag ban.
- Played a key role in preventing the advancement proposals for a toxic plastics incineration plant to be built, which would have bypassed state oversight.
- Provided leadership in advocating for the \$50 million Green Bond—Question No. 3 on the referendum ballot that passed with 66.9% voter approval in November 2022. This Green Bond will support investments in open space, outdoor recreation, land revitalization, green energy, climate resilience, forestland, habitat, wildlife conservation, water quality, and new facilities at Roger Williams Park and Zoo.
- As a member of the Green Infrastructure Coalition, Audubon advocates for sustainable funding for nature-based stormwater management. Stormwater pollution affects water quality throughout the state—especially with more extreme storms and flooding. Treating stormwater with green strategies like rain gardens and swales provides climate resilience and enhances wildlife habitats.
- Provides leadership for the Providence Stormwater Innovation Center, which showcases nature-based stormwater practices, engages communities in solutions to improve water quality, provides training on green infrastructure, and tests innovative treatment technologies.
- With the Rhode Island Land Trust Council, organizes and hosts the annual Land & Water Conservation Summit, Rhode Island's premier gathering of over 300 conservation volunteers and professionals.

Glenn Osmundson

AUDUBON PROTECTED LAND

LITTLE COMPTON 36 acres

1. ELIZABETH H. TURNER WILDLIFE REFUGE

Protected since 1999; Approximately 17 acres

This vital forested habitat is in a rapidly changing landscape and provides habitat for birds and other wildlife.

2. HAFFENREFFER WILDLIFE REFUGE

Protected since 2001; Approximately 14 acres

Coastal grassland and shrubby edges are key stopover spots for migrating birds.

3. LONG POND MARSH WILDLIFE REFUGE

Protected since 1991; Approximately 1 acre

4. SPECTACLE ISLAND WILDLIFE REFUGE

Protected since 1972; Approximately 4 acres

TIVERTON 63 acres

5. EMILIE RUECKER WILDLIFE REFUGE *

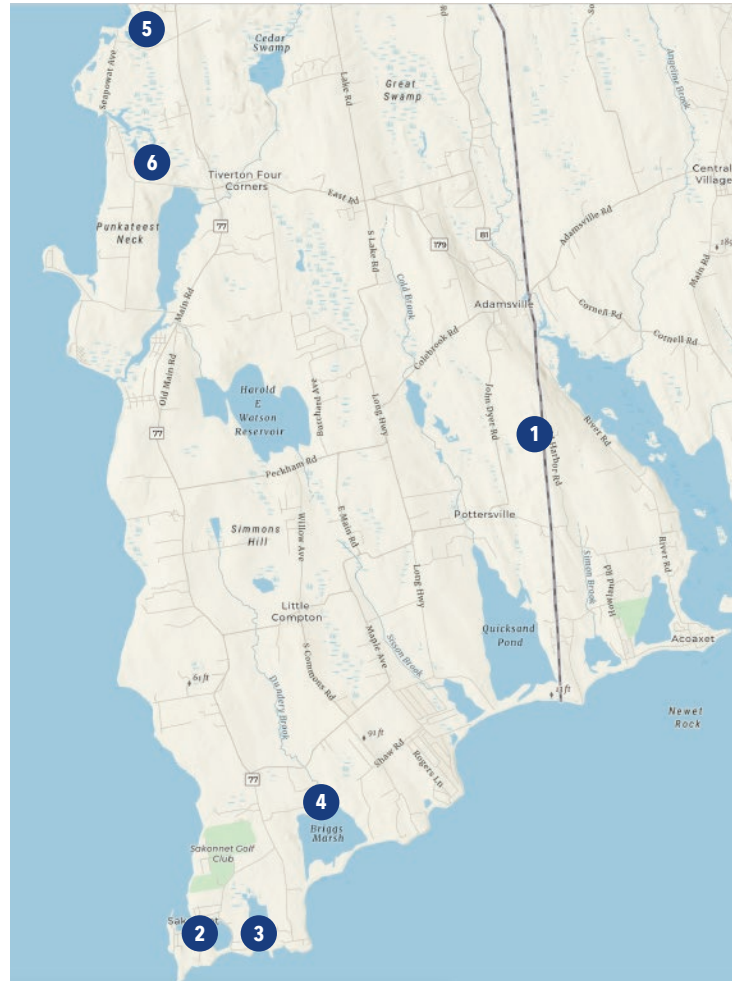

Protected since 1965; Approximately 51 acres

A mix of upland forest and extensive salt marsh offers habitat for many birds and wildlife.

6. SAPOWET MARSH WILDLIFE REFUGE

Protected since 1993; Approximately 12 acres

Coastal habitat protects birds as well as surrounding areas from storms.

* Wildlife refuge with trails open to the public. Visit asri.org/hike for details.
